SUMMARY OF QUALIFICATIONS

Passionate **Product Designer** with experience in creating intuitive and visually engaging modern interfaces for all technologies. Highly skilled in wireframing, prototyping, and user research, with proficiency in Figma for designing interactive prototypes, and mockups. Skilled in influencing product decisions and bridging the gap between technical and non-technical audiences effectively. Strong problem-solving mindset focused on practical, user-centered solutions. Eager to learn it all in the Product ecosystem.

WORK EXPERIENCE

Asterdio | Mid-Level Product Designer

(Jan 2024 – Present)

- Took initiative in client discussions, presenting SaaS product concepts, gathering feedback, and ensuring design decisions met user and business objectives.
- Worked on multiple web and mobile SaaS products, managing time effectively, collaborating closely with developers, and achieving 100% work completion.

Achievements / Recognitions: Was selected as a Fast-Track New Employee, and secured Runner-Up position in a Product Designer Hackathon.

Featherwebs Technology | Associate UI/UX Designer

(August 2023 - February 2024)

- Designed SaaS products for web and mobile, creating user flows, wireframes, and scalable design systems, including government platforms.
- Took leadership initiative by guiding design decisions and supporting collaboration across teams.

Krafters Technology | UI/UX Designer Intern

(March 2023 - August 2023)

- Gained experience in user research techniques, wireframing, prototyping, design reviews, and testing by receiving constructive feedback.
- Contributed to building an internal tool for tracking employee attendance.

SELECTED PROJECTS

Ncell Mobile Application | Mobile App Redesign

Redesigned the Ncell app to make it more intuitive and visually appealing. Improved UX significantly, boosting user engagement by 70%.

Kirtipur Municipality Website | Government Website Redesign

Redesigned this government website to make it easier for a diverse audience to use by focusing on information architecture, UX flows, and a clean, modern interface that improves accessibility and clarity.

Argon HRMS | SaaS Product (System & Marketing Website)

Designed from scratch, from research, wireframing, iterative prototyping, and feedback sessions, to creating user-friendly features such as e-attendance, leave tracking, and employee management.

Auto24 | Automotive Platform (AI Search Feature)

Designed the AI-powered search feature with intuitive flows and responsive interfaces, enabling users to easily find vehicles and improving the overall user experience.
